

2022 GRATITUDE REPORT IMPACT SUMMARY

YOUR IMPACT

Thanks to your continuous generosity, we are transforming patient care at Providence Cedars-Sinai Tarzana Medical Center. We are grateful for the community's support that made these enhancements possible, allowing the hospital to continue to excel as a leader in patient care.

ION SYSTEM FOR THORACIC SURGERY PROGRAM

The Ion endoluminal system is a robotic-assisted platform for minimally invasive biopsy in the lung. Ion was built on the belief that collecting lung tissue samples for biopsy could be safe and simple, even when nodules are small and located in the peripheral lung. Ion's ultrathin, ultra maneuverable catheter allows clinicians to reach small lesions in all 18 segments of the lung, and its unprecedented stability enables the precision needed for biopsy.

TARZANA REIMAGINED CAMPAIGN

We are humbled by the generous partnerships formed with individuals, families and organizations and for their commitment to the Tarzana Reimagined Campaign. This campaign envisioned building a beautiful medical campus with brand-new facilities, leading-edge technologies and a harmonious design to foster restoration and healing for all, from the most vulnerable babies taking their first breaths, to those entering the later stages of their lives with dignity and grace.

We are thankful to our donors for providing the foundation for our community medical center expansion in 2022, fostering better health for you, your loved ones and all who seek our care.

CAREGIVER APPRECIATION AND TRAINING

In support of our caregivers, we provided our nurses with physical and mental wellness resources for Nurse Appreciation Week and thanked them for their endless dedication to our community. We are also expanding opportunities for caregivers to further their education by attending conferences and trainings.
